REASONS FOR ALLOWANCE

1. Claims 1-8, 13-15, 19-28 and 35 have been allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-8, 13-15, 19-28 and 35, wherein the claimed invention comprises a lamp providing a white light along a first light path, servo positioning said lamp, a partial mirror on said first path, said partial mirror separating said white light into a primary beam and a secondary beam, relay lenses, red-blue-green color splitting prisms and a micro-controller coupled to servo motors, as claimed. The prior art also fails to teach a retrofit automated lamp focus and brightness control assembly for a spatial light modulator based projection system comprising a partial turning mirror allowing a portion of the system's projected light to pass through and a focusing lens receiving said portion of light from the partial turning mirror, said light reflecting off a secondary turning mirror on the surface of a light detector, wherein the output of said light detector is used to control the brightness and light distribution of a light source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Morita et al. (4598197), Mizutani (4598197) and Reis (6299310) are cited for disclosing optical device having a turning mirror and a luminosity detector.
